

CSS Website Layout

Website Layout

A website is often divided into headers, menus, content and a footer:

Header

A header is usually located at the top of the website (or right below a top navigation menu). It often contains a logo or the website name:

```
.header {  
  background-color: #F1F1F1;  
  text-align: center;  
  padding: 20px;  
}
```

Example 1

```
<!DOCTYPE html>  
<html lang="en">
```

```
<head>
  <title>CSS Website Layout</title>
  <meta charset="utf-8">
  <meta name="viewport" content="width=device-width, initial-scale=1">
  <style>
    body {
      margin: 0;
    }
    /* Style the header */

    .header {
      background-color: #f1f1f1;
      padding: 20px;
      text-align: center;
    }
  </style>
</head>

<body>

  <div class="header">
    <h1>Header</h1>
  </div>

</body>

</html>
```

Result

Navigation Bar

A navigation bar contains a list of links to help visitors navigating through your website:

```
/* The navbar container */
.topnav {
  overflow: hidden;
  background-color: #333;
}

/* Navbar links */
.topnav a {
  float: left;
```

```
display: block;
color: #f2f2f2;
text-align: center;
padding: 14px 16px;
text-decoration: none;
}

/* Links - change color on hover */
.topnav a:hover {
background-color: #ddd;
color: black;
}
```

Example 2

```
<!DOCTYPE html>
<html lang="en">

<head>
    <title>CSS Website Layout</title>
    <meta charset="utf-8">
    <meta name="viewport" content="width=device-width, initial-scale=1">
    <style>
        * {
            box-sizing: border-box;
        }

        body {
            margin: 0;
        }
        /* Style the header */

        .header {
            background-color: #f1f1f1;
            padding: 20px;
            text-align: center;
        }
        /* Style the top navigation bar */

        .topnav {
            overflow: hidden;
            background-color: #333;
        }
        /* Style the topnav links */

        .topnav a {
            float: left;
            display: block;
            color: #f2f2f2;
            text-align: center;
            padding: 14px 16px;
        }
```

```
        text-decoration: none;
    }
    /* Change color on hover */

    .topnav a:hover {
        background-color: #ddd;
        color: black;
    }

```

</style>

</head>

<body>

<div class="header">

<h1>Header</h1>

</div>

<div class="topnav">

Content Unequal Columns

The main content is the biggest and the most important part of your site.

It is common with unequal column widths, so that most of the space is reserved for the main content. The side content (if any) is often used as an alternative navigation or to specify information relevant to the main content. Change the widths as you like, only remember that it should add up to 100% in total:

```
.column {  
    float: left;  
}  
  
/* Left and right column */  
.column.side {  
    width: 25%;  
}
```

```
/* Middle column */
.column.middle {
    width: 50%;
}

/* Responsive layout – makes the three columns stack on top of each other
instead of next to each other */
@media screen and (max-width: 600px) {
    .column.side, .column.middle {
        width: 100%;
    }
}
```

Example 4

```
<!DOCTYPE html>
<html lang="en">

<head>
    <title>CSS Website Layout</title>
    <meta charset="utf-8">
    <meta name="viewport" content="width=device-width, initial-scale=1">

Footer

The footer is placed at the bottom of your page. It often contains information like copyright and contact info:

```
.footer {  
background-color: #F1F1F1;  
text-align: center;  
padding: 10px;  
}
```

Example 5

```
<!DOCTYPE html>
<html lang="en">

<head>
    <title>CSS Website Layout</title>

Responsive Website Layout

By using some of the CSS code above, we have created a responsive website layout, which varies between two columns and full-width columns depending on screen width:

Example 6

```
<!DOCTYPE html>
<html>

<head>
```

```
<style>
  * {
    box-sizing: border-box;
  }

  body {
    font-family: Arial;
    padding: 10px;
    background: #f1f1f1;
  }
  /* Header/Blog Title */

  .header {
    padding: 30px;
    text-align: center;
    background: white;
  }

  .header h1 {
    font-size: 50px;
  }
  /* Style the top navigation bar */

  .topnav {
    overflow: hidden;
    background-color: #606;
  }
  /* Style the topnav links */

  .topnav a {
    float: left;
    display: block;
    color: #f2f2f2;
    text-align: center;
    padding: 14px 16px;
    text-decoration: none;
  }
  /* Change color on hover */

  .topnav a:hover {
    background-color: #ddd;
    color: black;
  }
  /* Create two unequal columns that floats next to each other */
  /* Left column */

  .leftcolumn {
    float: left;
    width: 75%;
  }
  /* Right column */

  .rightcolumn {
    float: left;
```

```
    width: 25%;  
    background-color: #f1f1f1;  
    padding-left: 20px;  
}  
/* Fake image */  
  
.fakeimg {  
    background-color: #aaa;  
    width: 100%;  
    padding: 20px;  
}  
/* Add a card effect for articles */  
  
.card {  
    background-color: white;  
    padding: 20px;  
    margin-top: 20px;  
}  
/* Clear floats after the columns */  
  
.row:after {  
    content: "";  
    display: table;  
    clear: both;  
}  
/* Footer */  
  
.footer {  
    padding: 20px;  
    text-align: center;  
    background: #ddd;  
    margin-top: 20px;  
}  
/* Responsive layout – when the screen is less than 800px wide,  
make the two columns stack on top of each other instead of next to each  
other */  
  
@media screen and (max-width: 800px) {  
    .leftcolumn,  
    .rightcolumn {  
        width: 100%;  
        padding: 0;  
    }  
}  
/* Responsive layout – when the screen is less than 400px wide,  
make the navigation links stack on top of each other instead of next to  
each other */  
  
@media screen and (max-width: 400px) {  
    .topnav a {  
        float: none;  
        width: 100%;  
    }  
}
```

```
</style>
</head>

<body>

    <div class="header">
        <h1>My Website</h1>
        <p>Resize the browser window to see the effect.</p>
    </div>

    <div class="topnav">
        <a href="#">Link</a>
        <a href="#">Link</a>
        <a href="#">Link</a>
        <a href="#" style="float:right">Link</a>
    </div>
